MINIMUM SPECIFICATIONS CHAINLINK FENCING

GENERAL SPECIFICATIONS:

All fencing is to be of industrial/commercial quality per the following specifications. All fencing will be inspected before posts are set in concrete to determine depth and diameter of setting and a final inspection will be made prior to final payment. No payment will be made until all specifications are complied with. Requests for inspections are to be made a minimum of 48 hours in advance. If the contractor fails to request and receive an inspection as specified, no payment will be made until the inspection is made. If an inspection has not been done prior to the setting of posts, all posts are to be removed and reset with proper inspection.

All fencing is to be Knuckle & Knuckle and follow the ground contour in such a manner that a standard baseball can not roll under the fence at any point. Where the fence goes along an asphalted area, install the fence on the asphalt with a 6" clearance from the fabric to the edge of asphalt. This specification may be waived if approved by the Public Works Department.

Chain link fabric is to be 9 GA. 2" mesh, 2 oz. G.A.W (Galvanized After Weaving). A manufacturer's certificate attesting to this fact must be presented before payment.

Chain link fencing prices will be firm for a period of four months. After four months, the County may approve the option of renewing the contract in periods of between four months and one year at the same or lesser price for a total period of three years with the agreement of the bidder.

All gate latches are to be of commercial saddle types. At the Public Works Director's option, a chain and lock with the lock shackle welded to the chain and the chain attached to one side of the fence will be provided. The lock shall be a Master Brand # 5 (No Substitutes). Locks shall be keyed alike if more than one lock is to be provided per job. All gates are to be of commercial quality, welded joint, 1-5/8" O.D., the same fabric as the fence, and bolted in type.

Post Location - Space line posts equidistant at intervals not exceeding 10 ft. in straight line runs. Measure the interval parallel to the grade of the proposed fence and in the line of the fence from center to center of the post. Set terminal posts (end, corner, and gate) at the beginning and end of each straight continuous length of fence and at abrupt changes in horizontal alignments.

All fencing shall be hung on the exterior of the enclosure.

Bidder shall agree to have all materials and start work within 30 days after being notified by the Public Works Department for each project that has been approved.

The Board of County Commissioners reserves the right to use this bid to set pricing for future fencing needs, and retains the option to bid out large jobs.

All contractors shall have the required insurance for working in Santa Rosa County, and on County right-of-ways.
